

AstroMax Introductory Astronomy Telescope Kit

Chandler *First Light* Astronomy Kit for Small Telescopes and Binoculars

First Light brings together the essential resources a beginner needs to get started observing the sky. *First Light* includes \$40 worth of materials at a fraction of the cost.

What does a beginner need to get off to a successful start observing the sky? *First Light* is our answer to that need. It brings together *The Night Sky*, our uniquely designed low-distortion planisphere, *Exploring the Night Sky with Binoculars*, our award winning introduction to observational astronomy, and *Sky Atlas for Small Telescopes and Binoculars*, our sky atlas designed specifically for beginners with small optics.

But *First Light* is more. You get a three-year planet locator, a three-year daily moon phase calendar, a reference card on comets, a table of the best meteor showers, and an observing log master page to be duplicated to start a well-organized observing logbook. The kit comes beautifully packaged in a heavy-duty two-pocket folder to be saved and used for organizing and protecting your astronomy materials.

ASTELE® 70 Maksutov-Cassegrain Telescope

A *QUALITY* Alternative to the Department Store Refractor—and the Perfect Travel Scope

The ASTELE® 70 is a Maksutov-Cassegrain 70-mm telescope, suitable for use both as an astronomical telescope and a terrestrial spotting scope. Not only is this telescope a good choice for beginning astronomers as an alternative to the traditional 60-mm "department store" refractor, but the superb Russian made optics and compact design make it a highly portable travel scope. With the addition of a solar filter, it would also be a great scope for photographing sunspots, and its portability and field of view make it perfect for both lunar and solar eclipse photography.

FREE AAAA Membership and New Member Packet

New members to the AAAA will receive in the mail a Membership Packet to help get started in astronomy and become acquainted with the AAAA and its services. This packet contains the following items:

- * The AAAA booklet *A Primer for the Beginning Stargazer*.
- * The booklet *Getting Started in Astronomy* by Sky & Telescope Magazine.
- * The flyer *Choosing Your First Telescope* from Sky Publishing.
- * The latest issue of the AAAA's newsletter *The American Astronomer*.
- * A list of products available from Astronomical League Sales.
- * Requirements for all Astronomical League Observing Programs.
- * The flyers for the Binocular Messier Club and the Urban Club.
- * Free AAAA logo ballpoint pen - suitable for filling out observing logs.

AstroMax

Introductory Astronomy Telescope Kit

A *QUALITY* Alternative to the Department Store Refractor

The American Association of Amateur Astronomers teams up with LOMO® PLC, Bushnell Sports Optics, and the David Chandler Company to offer a complete telescope package for beginning astronomers! Our new package consists of an ASTELE® 70 Maksutov-Cassegrain 70-mm telescope, a Bushnell Field Tripod, the Chandler *First Light* Astronomy Kit, a Night Reader LED Keychain Flashlight, and a full year membership in the AAAA! A \$400 value, all at a great price of only \$260 from AstroMax, the AAAA *Online* Store

A Telescope and Star Charts

Our ASTELE® 70 Maksutov-Cassegrain 70-mm telescope is manufactured by LOMO® PLC in St. Petersburg, Russia, and retails for \$290. Not only does it have an excellent field of view and crisp star images, but it is a quality alternative to that cheap 60-mm "department store" telescope you may be thinking of buying.

The Chandler *First Light* Astronomy Kit is the best introductory observing program on the market. This kit contains \$40 worth of essential resources for the beginning amateur astronomer. It is a great value when purchased as part of the AstroMax *Introductory Astronomy Telescope Kit*.

FREE AAAA Membership

In our AstroMax *Introductory Astronomy Telescope Kit*, you also get Full Membership in the AAAA, including our quarterly newsletter, *The American Astronomer*, a one-year subscription to the REFLECTOR, the Astronomical League Newsletter, and the brochures *How to Get Started in Astronomy* and *How to Buy a Telescope*. You also get an AAAA logo pen, suitable for filling out observing logs. Hundreds of people have joined at \$20, just for the membership benefits alone.

A Perfect Gift

The AstroMax *Introductory Astronomy Telescope Kit* is a perfect gift, too, for Christmas, birthdays, and other special occasions. And your recipient will enjoy all the Privileges of Membership in the AAAA and the Astronomical League.
